

Meeting Place: 930 Wildwood, Oak Conference Room, Jefferson City, MO 65102

1

<p>Physician Subgroup Update Dr. Pelikan</p>	<p>and the contractor doesn't show up. 4. Allows the Department to assess a fine for violation of state regulations 5. Requires the Department of Social Service to seek a Medicaid waiver. 6. Requires foster children who live in Universal Testing areas to have an annual Blood Lead Level test until 6 years of age.</p> <p><u>SB 751-Coleman, HB1097-Schaff, HB 849-Hubbard</u></p> <p>1. Allows the Department to levy fines for failure to notify the Department of lead abatement projects. 2. Requires the submission of a clearance report, to the Department, upon completion of an abatement project. 3. Requires the lead abatement contractor to post a bond prior to becoming licensed.</p> <p><u>SB 1083-Kennedy, HB 1318-Schaff</u></p> <p>Changes the testing ages, for consistency, to "less than six years of age".</p> <p><u>SB 864-Dougherty</u></p> <p>1. Allows a tax credit to property owners who perform lead abatement on their property. 2. Allows for a \$1.00 check off, to be placed in the lead abatement fund, on the Missouri Tax Return.</p> <p>Leslie Warden had some concerns regarding the definition of Taxpayer in SB 864, and the ability to fine a property owner who does not take remedial action and, therefore, another child is poisoned in the property as stated in SB 746.</p> <p>The Physician Education Subgroup has met 3 times and has developed a format for an online course that will give physicians continuing medical</p>	<p>Leslie and DHSS will draft some language and get back to the Senator.</p> <p>The group will continue to meet and develop the educational online course.</p>

<p>Strategic Planning Susan Thomas</p>	<p>education units. Dr. Pelikan discussed what material would be in the course and how the course would be put onto the web by the DHSS CHIME staff.</p> <p>Susan Thomas handed out and discussed a flow chart that included Missouri's plans for lead poisoning prevention/elimination activities. The chart included; resources and partnerships, strategies and activities, outputs, short-term outcomes, intermediate outcomes and long-term outcomes. Susan continued to lead a discussion on what the States definition of Elimination should be. The discussion revolved around whether elimination should be focused on testing rates prevalence rates, or housing safety.</p> <p>The discussion resulted in Missouri's definition being that each jurisdiction in Missouri will have a prevalence rate at or below the national average as determined by the National Health and Nutrition Survey (NHANES).</p>	
<p>Topics and Concerns of Committee Members Open Discussion</p>	<p>Dave Mosby (DNR) handed out and discussed a map of Past and Present lead mining in Missouri and Superfund Sites. He expressed concern that some of these areas were not currently in an area of Missouri designated as "Universal Testing". He also gave an update on current testing/investigations in St. Louis City, Washington County and Viburnum.</p>	<p>Dave will send Susan an electronic version of this map and DHSS will try to incorporate its contents into the communication of high-risk areas.</p>
